SUMMARY

- 2 years of web development experiences with .NET CORE, JavaScript.
- Developed several commercial projects, proven problem-solving ability, and high attention to detail with the capability to solve real-life issues.
- Currently looking for opportunities as a junior/junior to mid .NET web/software developer to further improve my skills.

SKILLS LIST

- **.NET framework/.NET CORE**
- HTML, CSS (SASS, Bootstrap), **JavaScript** (jQuery, Ajax, ES6+)
- Database: **SQLServer**, MySQL, MongoDB, PostgreSQL
- Tools: VS 2019, Bitbucket/Git

WORK HISTORY

CloudCodex - .NET full stack developer 2019.09 - Present

CloudCodex is a technical company, focuses on software development, and IT services to support small businesses. Clients include global leading orthopedics company.

Website:

- Converted design to responsive websites using Piranha CMS, .NET core 3.1/5, Entity Framework. Customized CSS, Javascript/JQuery to improve general user experience pain points.
- [Everstone - Tiles company](#)
- [Perfection Interior - Interior fit-out provider](#)
- [Myosotis - Travel agent](#)
- [Fortune Property Group - Real estate company](#)
- [Anstar - Travel agent](#)

Coach management system:

- Web-based management application designed for travel agencies using **.NET framework 4.7, OrmLite**.

E-commerce:

- Modified e-commerce websites based on Nopcommerce. Developed customized plugins by reading **API** documentation of 3rd party services. Plugins include eBay & Amazon integration, AU POST shipping calculator, Securepay payment.

Articulate Pty Ltd. - Front-end developer Intern 2018.10 - 2019.01

A web-page game company. Work collaboratively with clients and in-house agency teams to provide responsive and client-acclaimed front- and back-end websites optimizing the user experience and related metrics.

- Created entry pages for redirection. Debugged using Chrome. **[Utilized: React, SASS, Lumen API]**
- Python Auto Data Checker: Maintained 17 sub-databases, verified 100k+ data transactions via SQL and Python scraper automatically on a daily basis. **[Utilized: Python Scraper, MySQL]**
- 2019 New Year Event website: Developed a player ranking board page from scratch. **[Utilized: React, Lumen, RESTful API]**

Apek Computer Technology - Web Developer Intern 2018.07 - 2018.10

- APEK ticketing system: Created role-based access control, interactive forms, and web pages for the internal company to manage 10k+ tickets more efficiently. **[Utilized: HTML, SASS, JS, Laravel, Laradock, MVC]**
- Created, managed, and resolved support tickets related to Microsoft Outlook, MS Windows, and MS Office suite on a daily basis.

PERSONAL PROJECTS

Portfolio

- Simple portfolio web pages with responsive design and smooth JS animation. ([Demo](#))
- Utilized: HTML, CSS/SASS, JS, npm, node.js

Laravel BBS

- A simple forum involves Multi-role user permission system, registration verification code, image upload, image cropping, XSS defense, custom middleware, Redis, etc. ([Demo](#): user name: summer@example.com, password: secret / [Source](#))
- Modern website development topics such as form validation, message notification, email notification, and model modifiers.
- Utilized: HTML, CSS/Bootstrap, JavaScript, PHP/Laravel, MVC, docker.

VOLUNTEER WORK

Australian Dongbei Chinese Chamber of Commerce Inc - Web-site developer 2020.03 - 2020.04
